

MIRNA SHOUKRY

JEWELLERY DESIGN · CAD · COLLECTION DEVELOPMENT

Abu Dhabi, UAE | shoukrymira@gmail.com | www.mirnashoukry.com | +971563805858

PROFILE

Jewellery designer with professional CAD experience and an independent practice spanning concept development, gemstone-led design and collection building. My work explores how cultural memory, architecture and material can become contemporary fine jewellery through proportion, repetition and precise construction.

EXPERIENCE

Jewelry CAD Designer

JEWELR · Toronto, Canada · 2019–2021

- Developed and refined 3D jewellery models from design briefs, sketches and customization requirements, balancing design intent with manufacturability.
- Modelled rings, pendants, earrings and personalized pieces with attention to stone seats, wall thickness, prong geometry, engraving zones and production tolerances.
- Worked iteratively with design and production teams on scale, comfort, setting clearance and repeatable manufacturing.

Founder & Jewelry Designer, *MirnaShoukry*

Toronto / Abu Dhabi · 2021–Present

- Developed an independent jewelry and photography practice focused on contemporary gold and gemstone pieces informed by cultural memory, architecture and wearable proportion.
- Led projects from visual research and hand sketching through CAD/concept visualization, material selection, on-body studies and collection presentation.
- Created Solar Heirloom, The Nile Collection and Stone Studies, building a visual language around articulated geometry, saturated stone colour and controlled ornament.

SELECTED PROJECTS

Solar Heirloom: articulated collar study exploring radial geometry, gold structure and light.

The Nile Collection: rings, cuff, earrings and pendant developed through a shared language of structure, colour and repetition.

Stone Studies: gemstone cut, surface, translucency and proportion studies informing later setting decisions.

EDUCATION

OCAD UNIVERSITY

Bachelor of Design
Toronto, Canada · 2019

LE ARTI ORAFE (LAO)

Jewellery Design Intensive
Florence, Italy · Summer 2026

DESIGN SKILLS

Jewellery CAD & 3D modelling
Technical drawing
Collection development
Form & proportion studies
Gemstone-led design
Stone-setting clearances
Articulation & closures
Concept visualization

SOFTWARE

RHINO
MATRIXGOLD
ZBRUSH
KEYSHOT
Adobe Creative Suite

MATERIALS & MAKING

Gold & precious metals
Gemstones & pearls
Wax modelling
Casting
Soldering
Stone setting
Finishing

ADDITIONAL

Languages
English, French, Arabic
